Sub: Cover Letter –Frontend Engineer

Dear sir/madam,

I am writing to express my interest in the opening for an Frontend Engineer at SHERPANY. I have a few experience as a Frontend Engineer as well as my personal interest in your company makes me an ideal candidate for this position.

I have basic knowledge of the programming languages that you wanted in your requirement. I have already passed two skill assessments on LinkedIn in javascript and CSS which is my achievement. It proved to me that I have basic knowledge and encouraged me to continue my learning. Also, I created more than 8 projects and 2 MERN stack projects in just only a few months. so I believe that if I continue my learning I can go forward.

As a fresher as well as non-CSE background it is quite impossible to build full-stack projects. But my patience and desire helped me to convert quite impossible to quite possible. I believe that my time investment will not be ineffective so I decided to choose it as my profession. Also, every company likes a hard-working person. I believe I am feet for them.

Some of my personal qualities which you may find useful for this role are:

- Ability to learn quickly coupled with innovative ideas for problem-solving
- Ability to work in a team with strong communication skills
- Hardworking and sincere towards work with an ability to take directions

Please find my detailed resume for your consideration. Should you need any more details, please do let me know.

Thanking you for your time and looking forward to hearing from you.

Sincerely

Hiramon Nahar Eva
